

Front End Developer

Kenneth Jaindl

Objective

My objective is to become part of team where I can learn, grow, and apply new skills.

Experience

February 2021

Soft Wash Technician *Native Pressure Washing and Home Watch*

Work as part of a two-man crew to provide exterior cleaning and sealing services, engage in direct marketing with clients' neighbors, and maintain the high-pressure system, two stroke engine, and 12v pump.

December 2020 – February 2021

Ordinary Seaman *Coastal Transportation Company*

While sailing on the Coastal Trader, I alternated between two roles, working both the deck and engine room on an alternating shift. I participated in both Engine Room and Wheelhouse watches, rebuilt sheave blocks and door dogs, manned the aft spring-line when departing from and arriving to port, and operate forklifts and pallet-jacks during cargo operations.

November 2019 – December 2020

Crew Lead/SEO and Marketing Associate *Algae Free LLC*

Work as part of a two-man crew to provide exterior cleaning and sealing services, engage in direct marketing with client neighbors, and maintain the high-pressure system, two stroke engine, and 12v pump. I also handled all aspects of www.algaefreellc.com content management, SEO, and online advertising.

June 2018 – October 2019

Account Manager *Top Peak Performance Marketing*

As an account manager at Top Peak I interviewed, selected, evaluated, and trained my own team of with whom I conducted door-to-door utility sales. A defining part of my strategy was that every week I would research and find a new territory to sell in and would then base my weekly morning meeting around it. Ranking neighborhoods by estimated power usage (I based this on building type) and demographics, I gave my team members and myself the best opportunity to knock on a door where the person not only needed our services but was also likely to give the salesman a chance to get his pitch off.

March 2017 – June 2018

Catering Coordinator/ Office Admin *Beefalo Bobs*

In my time at Beefalo Bobs, I worked my way through each department while working my way up to the office. My resourcefulness, product knowledge, and ability to communicate made me a frequently used asset for sales, event planning, and daily restaurant operations.

Education

2016-2017

GCSE A-Level/AS

Chavagnes International
College
(Department Vendee,
France)

2017

High School Diploma

Lorenzo Walker
Technical High
(Naples, Florida)

Skills

- UX Design
- JavaScript
- CSS
- HTML
- Account Management
- Cold Calling
- CRM

Interests

I enjoy the design process, whether it's writing music and designing sounds, making stop animated scenes, or creating interfaces and logos. I like both the aesthetic and functional aspects of design, ensuring that every element qualifies for both. I have also recently started learning blender, for the purpose of creating UI assets and SVGs to implement in my web projects.
